

**Ralph Volpe Bio:**

Ralph Volpe is a Freight Technology/Operations Specialist for the FHWA Resource Center, Operations Technical Service Team. Volpe is responsible for providing technical assistance, training, and deploying strategies and techniques to FHWA internal and external customers. Areas Volpe regularly supports include transportation systems management and operations, ITS, integrated corridor management, active transportation and demand management, oversize and overweight vehicle enforcement, performance management, and organizing/planning for operations, to name a few. Prior to joining FHWA in 2001, Volpe was a specialist in planning and public transportation for the Tennessee Department of Transportation. At the local level, Volpe was a senior transportation planner and program manager with a metropolitan planning organization in Louisville, KY. Volpe holds a BS and MS degree in Logistics and Civil Engineering, respectively, from the University of Tennessee, Knoxville.
