*The Chicago Metropolitan Agency for Planning (CMAP)
and its regional partners will host the second in a series of
Innovation + Integration summits.*

In developing the 2040 Regional Comprehensive Plan — due for completion in 2010 — CMAP is beginning a dialogue to develop a regional agenda for addressing climate change. This is one of the nation's first such efforts to take a regional approach. CMAP and its partners will collect pertinent research and analyze it to determine potential implications for communities across the region. The Climate Change summit agenda features distinguished speakers assessing risks and opportunities in terms of our energy future, human and natural resource health, infrastructure, commerce, and land-use and transportation planning.

This event is designed for policy makers and advocates across the following areas:
municipal, county and regional representation, land-use and transportation, economic
development, health and human services, natural resources, developers, business and civic
organizations, faith-based organizations, and CMAP board committees.
