

Project of the Year 2006: Nominated Project

Illinois Traffic Alert Email Notification System

The Illinois Traffic Alert System currently includes 72 route segments for the Chicago area expressway and tollway system. Individuals may register for this service at www.iltrafficalert.com to receive customized traffic reports. These customized reports contain vehicle speeds, travel times, construction, congestion, and incident information that may be received through an e-mail inbox, cell phone text message, or other e-mail enabled mobile devices.
