

Project of the Year 2006: Nominated Project

Open Road Tolling Signing Simulation

As part of a large scale federally endorsed demonstration project, the Tollway had UIC develop a driving simulation that allows the Tollway to test different sign configurations in a variety of lighting conditions. By using the simulation, valuable information was gained to help guide the field deployment of the signs.

Project:
**Open Road Tolling
Signing Simulation**

Project Leads:
Illinois Tollway
and
University of Illinois at
Chicago

Project Team:
Tollway Traffic
UIC Electronic Visualization Lab
Wilbur Smith Associates
